

Netti® III

A multifunction wheel chair which leaves nothing to be desired.

Its various possible combinations and its numerous available accessories always provide a stable and individual medical care.

ALU REHAB™

Thinking ahead - moving forward

Active + passive seat positioning

The back angle adjustment up to 40° and the possibility to regulate the seat angle up to 18° provide a sizable variety of individual adjustments in order to find a comfortable and firm seating position. To support the vertical transfer, the seat can be leaned forward by 10°.

Stable and firm

A widely diversified spectrum of back cushions give the upper body a stable fixture and a firm guidance. For extreme requirements, we invented the stable pelotte. It provides additional stability and correction to the torso. A 4-point-seat belt with a specially developed locking device and various other expedient accessories amplify your possibilities.

Unique transfer

The originally mounted sliding fit allows a back-conserving transfer into the wheel chair. In addition, the pelvis is brought into a stable position from the very first beginning, thus enabling a stable, decompressed seating position, which is adapted easily.

Variety of accessories

The range of accessories leaves nothing to be desired. From IV pole, fittings for artificial respiratory equipment and tables up to miscellaneous accessories for the head, seat, foot and leg area, the Netti III represents the ultimate wheel chair for individual medical care. You've got all possibilities to create "your" Netti III!

Ruggedised version? Not a problem.

The Netti III is the ideal basis for individual medical care solutions which are beyond standard. Seat widths of more than 100 cm, loads up to 400 kg and much more can be realized with the Netti III frame. An extensively autonomous conduct of life can be achieved by means of supplemental electric drives or a specific environment control.

Specification

Seat width:

35,38,40,43,45,50 cm
HD-version 55+60 cm

Seat depth:

39-49 cm
51-56 cm

Back rest height:

48+60 cm

Capacity:

125 kg
HD-version 160kg

Seat heights:

40,5-51,5 cm
without cushion

Weight:

34 kg
